Special Issue: Relative Effectiveness of Agricultural Countermeasure Techniques—REACT. Proceedings of a Workshop Organised by the Commission of the European Communities, DG XII-D-3 Radiation Protection Research, DG XI-A-1 Radiation Protection, Brussels, 1–4 October 1991

Preface xi

Introduction

Strategies for deployment of agricultural countermeasures
B.T. Wilkins, B.J. Howard, G.M. Desmet, R.M. Alexakhin and H. Maubert (Chilton and Grange-over-Sands, UK; Brussels, Belgium; Obninsk, Russian Federation; St Paul-lez-Durance, France) 1

General Principles Applied in the Use of Countermeasures

Sub-editor: M.G. Segal

Countermeasures in agricultural production as an effective means of mitigating the radiological consequences of the Chernobyl accident
R.M. Alexakhin (Obninsk, Russian Federation) 9

Agrotechnical countermeasures to be applied before and during deposition of radioactive fallout
C. Willrodt (Neuherberg, Germany) 21

Agricultural countermeasures following deposition of radioactivity after a nuclear accident
M.G. Segal (London, UK) 31

Countermeasures to Limit Contamination of Plant Products

Sub-Editor: A.V. Konoplev

Technical approaches to decontamination of terrestrial environments in the CIS (former USSR)
I.F. Vovk, V.V. Blagoyev, A.N. Lyashenko and I.S. Kovalev (Kiev and Chernobyl, Ukraine) 49

Mechanical and physical removing of soil and plants as agricultural mitigation techniques
A. Jouve, E. Schulte, P. Bon and A.L. Cardot (Saint Paul-lez-Durance, France) 65

A review of literature on the effectiveness of chemical amendments in reducing the soil-to-plant transfer of radiostrontium and radiocaesium
J. Lembrechts (Bilthoven, Netherlands) 81

Effect of soil-based countermeasures on solid-liquid equilibria in agricultural soils contaminated with radiocaesium and radiostrontium
A.F. Nisbet (Chilton, UK) 99
Blockade by fertilisers of caesium and strontium uptake into crops: effects on the root uptake process
G. Shaw (Ascot, UK) 119
Some principles behind the selection of crops to minimize radionuclide uptake from soil
E. Smolders and R. Merckx (Leuven, Belgium) 135
Influence of agricultural countermeasures on the ratio of different chemical forms of radionuclides in soil and soil solution
A.V. Konoplev, N.V. Viktorova, E.P. Virchenko, V.E. Popov, A.A. Bulgakov and G.M. Desmet (Obninsk, Russian Federation; Brussels, Belgium) 147

Summaries
Reduction of soil-plant transfer factors: mechanical aspects
H. Maubert, I. Vovk, J. Røed, G. Arapis and A. Jouve (Saint Paul-lez-Durance, France; Kiev, Ukraine; Roskilde, Denmark; Athens, Greece) 163
Change in land use and crop selection
R.M. Alexakhin, M.J. Frissel, E.H. Schulte, B.S. Prister, V.A. Vetrov and B.T.Wilkins (Obninsk, Russian Federation; St Paul-lez-Durance, France; Kiev, Ukraine; Vienna, Austria; Chilton, UK) 169
Application of fertilisers and ameliorants to reduce soil to plant transfer of radiocaesium and radiostrontium in the medium to long term — a summary
A.F. Nisbet, A.V. Konoplev, G. Shaw, J.F. Lembrechts, R. Merckx, E. Smolders, C.M. Vandecasteele, H. Lönsjö, F. Carini and O. Burton (Chilton, UK; Obninsk, Russian Federation; Ascot, UK; Bilthoven, Netherlands; Leuven, Gembloux and Mol, Belgium; Uppsala, Sweden; Piacenza, Italy) 173

Countermeasures to Limit Contamination of Animal Products
Sub-editor: K. Hove
Countermeasures used in the Ukraine to produce forage and animal food products with radionuclide levels below intervention limits after the Chernobyl accident
B.S. Prister, G.P. Perepelyatnikov and L.V. Perepelyatnikova (Kiev, Ukraine) 183
Effectiveness of countermeasures applied in Belarus to produce milk and meat with acceptable levels of radiocaesium after the Chernobyl accident
S.K. Firsakova (Gomel, Belarus) 199
Chemical methods to reduce the radioactive contamination of animals and their products in agricultural ecosystems
G. Voigt (Neuherberg, Germany) 205
Management methods of reducing radionuclide contamination of animal food products
B.-E.V. Jones (Uppsala, Sweden) 227

Chemical methods for reduction of the transfer of radionuclides to farm animals in semi-natural environments
K. Hove (Ås, Norway) 235
Management methods of reducing radionuclide contamination of animal food products in semi-natural ecosystems
B.J. Howard (Grange-over-Sands, UK)..... 249

Summary
Countermeasures for reducing radioactive contamination of farm animals and farm animal products
K. Hove, P. Strand, G. Voigt, B.-E.V. Jones, B.J. Howard, M.G. Segal, K. Pollaris and J. Pearce (Ås, Germany; Østerås, Norway; Neuherberg, Germany; Uppsala, Sweden; Grange-over-Sands, London and Belfast, UK; Mol, Belgium) 261

Countermeasures for Reducing Radiation Doses Arising From Forest Ecosystems
Sub-editors: O. Guillitte and G. Shaw
An assessment of experimental and potential countermeasures to reduce radionuclide transfers in forest ecosystems
O. Guillitte and C. Willdrodt (Gembloux, Belgium; Neuherberg, Germany) 273
Forests and forestry: radiation protection measures with special reference to the Chernobyl accident zone
F.A. Tikhomirov, A.I. Shcheglov and V.P. Sidorov (Moscow, Russian Federation) 289

Summary
Decontamination methods for reducing radiation doses arising from radioactive contamination of forest ecosystems — a summary of available countermeasures
O. Guillitte, F.A. Tikhomirov, G. Shaw, K. Johanson, A.J. Dressler and J. Melin (Gembloux, Belgium; Moscow, Russian Federation; Ascot, UK; Uppsala, Sweden; Villigen, Switzerland; Stockholm, Sweden) 307
